

Proposed Accounting Standards Update

Issued: May 14, 2019
Comments Due: June 28, 2019

Income Taxes (Topic 740)

Simplifying the Accounting for Income Taxes

The Board issued this Exposure Draft to solicit public comment on proposed changes to Topic 740 of the *FASB Accounting Standards Codification*[®]. Individuals can submit comments in one of three ways: using the electronic feedback form on the FASB website, emailing comments to director@fasb.org, or sending a letter to “Technical Director, File Reference No. 2019-700, FASB, 401 Merritt 7, PO Box 5116, Norwalk, CT 06856-5116.”

Notice to Recipients of This Exposure Draft of a Proposed Accounting Standards Update

The Board invites comments on all matters in this Exposure Draft until June 28, 2019. Interested parties may submit comments in one of three ways:

- Using the electronic feedback form available on the FASB website at [Exposure Documents Open for Comment](#)
- Emailing comments to director@fasb.org, File Reference No. 2019-700
- Sending a letter to “Technical Director, File Reference No. 2019-700, FASB, 401 Merritt 7, PO Box 5116, Norwalk, CT 06856-5116.”

All comments received are part of the FASB’s public file and are available at www.fasb.org.

The *FASB Accounting Standards Codification*[®] is the source of authoritative generally accepted accounting principles (GAAP) recognized by the FASB to be applied by nongovernmental entities. An Accounting Standards Update is not authoritative; rather, it is a document that communicates how the Accounting Standards Codification is being amended. It also provides other information to help a user of GAAP understand how and why GAAP is changing and when the changes will be effective. A copy of this Exposure Draft is available at www.fasb.org.

Amendments to the XBRL Taxonomy	38

Summary and Questions for Respondents

Why Is the FASB Issuing This Proposed Accounting Standards Update (Update)?

The Board is issuing this proposed Update as part of its initiative to reduce complexity in accounting standards (the Simplification Initiative). The objective of the Simplification Initiative is to identify, evaluate, and improve areas of generally accepted accounting principles (GAAP) for which cost and complexity can be reduced while maintaining or improving the usefulness of the information provided to users of financial statements. The specific areas of potential simplification in this proposed Update were submitted by stakeholders as part of the Simplification Initiative.

Who Would Be Affected by the Amendments in This Proposed Update?

The amendments in this proposed Update would affect entities within the scope of Topic 740, Income Taxes.

What Are the Main Provisions?

The amendments in this proposed Update would simplify the accounting for income taxes in Topic 740 by removing the following exceptions:

1. Exception to the incremental approach for intraperiod tax allocation when there is a loss from continuing operations and income or a gain from other items (for example, discontinued operations or other comprehensive income)
2. Exception to the requirement to recognize a deferred tax liability for equity method investments when a foreign subsidiary becomes an equity method investment
3. Exception to the ability not to recognize a deferred tax liability for a foreign subsidiary when a foreign equity method investment becomes a subsidiary
4. Exception to the general methodology for calculating income taxes in an interim period when a year-to-date loss exceeds the anticipated loss for the year.

The amendments in this proposed Update also would simplify the accounting for income taxes in Topic 740 by doing the following:

1. Requiring that an entity recognize a franchise tax (or similar tax) that is partially based on income in accordance with Topic 740 and account for any incremental amount incurred as a non-income-based tax
2. Requiring that an entity evaluate when a step up in the tax basis of goodwill should be considered part of the business combination in which the book goodwill was originally recognized and when it should be considered a separate transaction
3. Specifying that an entity is not required to allocate the consolidated amount of current and deferred tax expense to a legal entity that is not subject to tax in its separate financial statements but that an entity may elect to do so for a legal entity that is disregarded by the taxing authority
4. Requiring that an entity reflect the effect of an enacted change in tax laws or rates in the annual effective tax rate computation in the interim period that includes the enactment date
5. Making minor Codification improvements for income taxes related to employee stock ownership plans and investments in qualified affordable housing projects accounted for using the equity method.

How Would the Main Provisions Differ from Current Generally Accepted Accounting Principles (GAAP) and Why Would They Be an Improvement?

The amendments in this proposed Update would simplify the accounting for income taxes by removing certain exceptions to the general principles in Topic 740. The proposed amendments also would improve consistent application of and simplify GAAP for other areas of Topic 740 by clarifying and amending guidance that already exists within GAAP.

When Would the Amendments Be Effective?

The effective date and whether early adoption of the amendments in this proposed Update should be permitted will be determined after the Board considers stakeholder feedback on the proposed amendments.

The amendments in this proposed Update related to (1) separate financial statements of legal entities that are not subject to tax and (2) franchise taxes that are partially based on income would be applied on a retrospective basis for all periods presented. The proposed amendments related to changes in ownership of foreign equity method investments or foreign subsidiaries would be applied on a modified retrospective basis through a cumulative-effect adjustment to retained earnings as of the beginning of the period of adoption. All other proposed amendments would be applied on a prospective basis.

Questions for Respondents

The Board invites individuals and organizations to comment on all matters in this proposed Update, particularly on the issues and questions below. Comments are requested from those who agree with the proposed guidance as well as from those who do not agree. Comments are most helpful if they identify and clearly explain the issue or question to which they relate. Those who disagree with the proposed guidance are asked to describe their suggested alternatives, supported by specific reasoning.

Question 1: Do you agree that the amendments in this proposed Update would simplify the accounting for income taxes? If not, please explain which proposed amendment(s) you disagree with and why.

Question 2: Do the proposed amendments maintain or improve the usefulness of information provided to users? Alternatively, would the proposed amendments result in the elimination of decision-useful information? Please explain why or why not.

Question 3: Are the proposed amendments operable and auditable? If not, which aspects pose operability or auditability issues and why? Would any of the proposed amendments impose significant incremental costs? If so, please describe the nature and extent of the additional costs.

Question 4: Are the transition requirements and transition disclosures for the proposed amendments appropriate? If not, what transition approach or transition requirements would be more appropriate and why?

Question 5: How much time would be needed to adopt the proposed amendments? Should early adoption be permitted? Should entities other than public business entities be provided with an additional year to implement the proposed amendments? Why or why not?

Amendments to the *FASB Accounting Standards Codification*[®]

Summary of Proposed Amendments to the Accounting Standards Codification

1. The following table provides a summary of the proposed amendments to the Accounting Standards Codification.

Codification Section	Description of Changes
Income Taxes— Overall—Scope and Scope Exceptions (740-10-15)	<ul style="list-style-type: none">Amend the scope of Topic 740 to require a franchise tax (or similar tax) that is partially based on income to be recognized in accordance with Topic 740 with any incremental amount accounted for as a non-income-based tax
Recognition (740-10-25)	<ul style="list-style-type: none">Amend the guidance to clarify when a step up in the tax basis of goodwill should be considered part of the business combination in which the book goodwill was originally recognized and when it should be considered a separate transaction
Initial Measurement (740-10-30)	<ul style="list-style-type: none">Amend the guidance to specify that an entity is not required to allocate the consolidated amount of current and deferred tax expense to a legal entity that is not subject to tax in its separate financial statements but that an entity may elect to do so for a legal entity that is disregarded by the taxing authority
Disclosure (740-10-50)	<ul style="list-style-type: none">Amend the guidance to require an entity that is not subject to tax that elects to include the allocated amount of current and deferred tax expense in its separately issued financial statements to disclose that fact and provide the

Introduction

2. The Accounting Standards Codification is amended as described in paragraphs 3–22. In some cases, to put the change in context, not only are the amended paragraphs shown but also the preceding and following paragraphs. Terms from the Master Glossary are in **bold** type. Added text is underlined, and deleted text is ~~struck out~~.

Amendment to Master Glossary

3. Supersede the Master Glossary term *Tax Consequences* from Subtopic 740-20 as follows:

Tax Consequences

~~The effects on income taxes—current or deferred—of an event.~~

Amendments to Subtopic 740-10

4. Amend paragraph 740-10-15-4, with a link to transition paragraph 740-10-65-9, as follows:

Income Taxes—Overall

Scope and Scope Exceptions

740-10-15-4 The guidance in this Topic does not apply to the following transactions and activities:

- A franchise tax (or similar tax) to the extent it is based on capital and there is no additional portion of the tax based on income. ~~If there is an additional~~

~~tax based on income, that excess is considered an income tax and is subject to the guidance in this Topic. If a franchise tax is partially based on income (for example, an entity pays the greater of an income-based tax and a non-income-based tax), deferred tax assets and liabilities shall be recognized and accounted for in accordance with this Topic. The amount of current tax expense that is based on income shall be accounted for in accordance with this Topic, with any incremental amount incurred accounted for as a non-income-based tax. See Example 17 (paragraph 740-10-55-139) for an example of how to apply this guidance.~~ the determination of whether a franchise tax is an income tax.

- b. A withholding tax for the benefit of the recipients of a dividend. A tax that is assessed on an entity based on dividends distributed is, in effect, a withholding tax for the benefit of recipients of the dividend and is not an income tax if both of the following conditions are met:
1. The tax is payable by the entity if and only if a dividend is distributed to shareholders. The tax does not reduce future income taxes the entity would otherwise pay.
 2. Shareholders receiving the dividend are entitled to a tax credit at least equal to the tax paid by the entity and that credit is realizable either as a refund or as a reduction of taxes otherwise due, regardless of the tax status of the shareholders.

See the guidance in paragraphs 740-10-55-72 through 55-74 dealing with determining whether a payment made to a taxing authority based on dividends distributed is an income tax.

5. Amend paragraph 740-10-25-54, with a link to transition paragraph 740-10-65-9, as follows:

Recognition

> Transactions Directly between a Taxpayer and a Government

740-10-25-53 Transactions directly between a taxpayer and a government (in its capacity as a taxing authority) shall be recorded directly in income (in a manner similar to the way in which an entity accounts for changes in tax laws, rates, or other tax elections under this Subtopic). (See Example 26 [paragraph 740-10-55-202] for an illustration of a transaction directly with a governmental taxing authority.)

740-10-25-54 An entity shall determine whether a step up in the tax basis of goodwill relates to the business combination in which the book goodwill was originally recognized or whether it relates to a separate transaction. In situations in which the tax basis step up relates to the business combination in which the book goodwill was originally recognized ~~that was previously not deductible~~, no deferred tax asset would be recorded for the increase in basis except to the extent

that the newly deductible goodwill amount exceeds the remaining balance of book goodwill. In situations in which the tax basis step up relates to a separate transaction, a deferred tax asset would be recorded in accordance with this Subtopic. Factors that may indicate that the step up in tax basis relates to a separate transaction include, but are not limited to, the following:

- a. A significant lapse in time between the transactions has occurred.
- b. The tax basis in the newly created goodwill is not the direct result of settlement of liabilities recorded in connection with the acquisition.
- c. The step up in tax basis is based on a valuation of the goodwill or business after the date of the business combination.
- d. The transaction resulting in the step up in tax basis requires more than a simple tax election.
- e. The entity must incur a cash tax cost or sacrifice existing tax attributes to achieve the step up in tax basis.
- f. The transaction resulting in the step up in tax basis was not contemplated at the time of the business combination.

6. Amend paragraph 740-10-30-27, with a link to transition paragraph 740-10-65-9, as follows:

Initial Measurement

> Allocation of Consolidated Tax Expense to Separate Financial Statements of Members

740-10-30-27 The consolidated amount of current and deferred tax expense for a group that files a consolidated tax return shall be allocated among the members of the group when those members issue separate financial statements. An entity is not required to allocate the consolidated amount of current and deferred tax expense to legal entities that are not subject to tax (for example, certain partnerships and disregarded entities such as single-member limited liability companies). However, an entity may elect to allocate the consolidated amount of current and deferred tax expense to legal entities that are not subject to tax and that are disregarded by the taxing authority. This Subtopic does not require a single allocation method. The method adopted, however, shall be systematic, rational, and consistent with the broad principles established by this Subtopic. A method that allocates current and deferred taxes to members of the group by applying this Topic to each member as if it were a separate taxpayer meets those criteria. In that situation, the sum of the amounts allocated to individual members of the group may not equal the consolidated amount. That may also be the result when there are intra-entity transactions between members of the group. The criteria are satisfied, nevertheless, after giving effect to the type of adjustments (including eliminations) normally present in preparing consolidated financial statements.

7. Add paragraph 740-10-50-17A, with a link to transition paragraph 740-10-65-9, as follows:

Disclosure

> Entities with Separately Issued Financial Statements That Are Members of a Consolidated Tax Return

740-10-50-17 An entity that is a member of a group that files a consolidated tax return shall disclose in its separately issued financial statements:

- a. The aggregate amount of current and deferred tax expense for each statement of earnings presented and the amount of any tax-related balances due to or from affiliates as of the date of each statement of financial position presented
- b. The principal provisions of the method by which the consolidated amount of current and deferred tax expense is allocated to members of the group and the nature and effect of any changes in that method (and in determining related balances to or from affiliates) during the years for which the above disclosures are presented.

740-10-50-17A An entity that is not subject to tax and that is disregarded by the taxing authority that elects to include the allocated amount of current and deferred tax expense in its separately issued financial statements in accordance with paragraph 740-10-30-27 shall disclose that fact and provide the disclosures required by paragraph 740-10-50-17.

8. Amend paragraphs 740-10-55-26 and 740-10-55-140 through 55-144, with a link to transition paragraph 740-10-65-9, as follows:

Implementation Guidance and Illustrations

> Implementation Guidance

> > Application of Accounting Requirements for Income Taxes to Specific Situations

> > > Measurement of Deferred Tax Liabilities and Assets

> > > > State and Local Income Taxes

740-10-55-26 Local (including franchise) taxes based on income are within the scope of this Topic. A tax, to the extent it is based on capital, is a franchise tax. As indicated in paragraph 740-10-15-4(a), if there is an additional tax based on income, that excess amount of a franchise tax based on income, that amount is considered an income tax. Any additional amount incurred is considered a non-

income-based tax. An ~~historical~~ example that illustrates this guidance is presented in Example 17 (see paragraph 740-10-55-139).

> Illustrations

> > Example 17: Determining Whether a Tax Is an Income Tax

740-10-55-139 The guidance in paragraph 740-10-55-26 addressing when a tax is an income tax is illustrated using the following historical example.

740-10-55-140 ~~In August 1991, a state amended its franchise tax statute to include a tax on income apportioned to the state based on the federal tax return. The new tax was effective January 1, 1992. The amount of a state's franchise tax on each corporation is set at the greater of 0.25 percent of the corporation's net taxable capital and 4.5 percent of the corporation's net taxable earned surplus. Net taxable earned surplus is was a term defined by the tax statute for federal taxable income.~~

740-10-55-141 ~~In this Example, the total computed tax is an income tax only to the extent that the tax exceeds the capital-based tax in a given year amount of franchise tax equal to the tax on the corporation's net taxable earned surplus is an income tax.~~

740-10-55-142 ~~A deferred tax liability is Deferred tax assets and liabilities are required to be recognized under this Subtopic for the amount by which the income-based tax payable on net reversing temporary differences that exist as of the date of the statement of financial position on the basis of the tax rate to be applied to the corporation's net taxable earned surplus (4.5 percent) in each future year exceeds the capital-based tax computed for each future year based on the level of capital that exists as of the end of the year for which deferred taxes are being computed.~~

740-10-55-143 ~~The portion of the current tax liability based on income total computed franchise tax that exceeds the amount equal to the tax on the corporation's net taxable earned surplus is required to be accrued with a charge to income during the period in which the income is earned total computed franchise tax exceeds the amount equal to the tax on the corporation's net taxable earned surplus. The portion of the deferred tax liability related to temporary differences is required to be recognized as of the date of the statement of financial position for temporary differences that exist as of the date of the statement of financial position.~~

740-10-55-144 ~~Because the state tax is an income tax only to the extent that the tax exceeds the capital-based tax in a given year, under the requirements of this Subtopic, deferred taxes are recognized for temporary differences that will reverse in future years for which annual taxable income is expected to exceed 5.5% (.25% of net taxable capital/4.5% of taxable income) of expected net taxable capital. In measuring deferred taxes, see paragraph 740-10-55-138 to determine whether a detailed analysis of the net reversals of temporary differences in each future year is warranted. While the tax statutes of states or other jurisdictions differ, the accounting described in paragraphs 740-10-55-140 through 55-143 above would~~

be appropriate if the tax structure of another state or jurisdiction was essentially the same as in this Example.

9. Add paragraph 740-10-65-9 and its related heading as follows:

Transition and Open Effective Date Information

> Transition Related to Accounting Standards Update No. 2019-XX, *Income Taxes (Topic 740): Simplifying the Accounting for Income Taxes*

740-10-65-9 The following represents the transition and effective date information related to Accounting Standards Update No. 2019-XX, *Income Taxes (Topic 740): Simplifying the Accounting for Income Taxes*:

- a. The pending content that links to this paragraph shall be effective for fiscal years, and interim periods within those fiscal years, beginning after [date to be inserted after exposure].
- b. An entity shall apply the pending content that links to this paragraph as follows:
 1. On a retrospective basis for all periods presented for the pending content that links to this paragraph related to:
 - i. Separate financial statements of legal entities that are not subject to tax
 - ii. Franchise taxes that are partially based on income.
 2. On a modified retrospective basis through a cumulative-effect adjustment to retained earnings as of the beginning of the period of adoption of the pending content that links to this paragraph for the pending content that links to this paragraph related to changes in ownership of foreign equity method investments or foreign subsidiaries
 3. On a prospective basis for the other pending content that links to this paragraph.
- c. An entity shall disclose the following in the first fiscal year after the entity's adoption date, and in the interim periods within the first fiscal year:
 1. The nature of and reason for the change in accounting principle
 2. The transition method
 3. A qualitative description of the financial statement line items affected by the change.

Amendments to Subtopic 740-20

10. Amend paragraph 740-20-45-7, with a link to transition paragraph 740-10-65-9, as follows:

Income Taxes—Intraperiod Tax Allocation

Other Presentation Matters

> Allocation to Continuing Operations

740-20-45-7 The tax effect of pretax income or loss from continuing operations generally should be determined by a computation that does not consider the tax effects of items that are not included in continuing operations. ~~The exception to that incremental approach is that all items (for example, discontinued operations, other comprehensive income, and so forth) be considered in determining the amount of tax benefit that results from a loss from continuing operations and that shall be allocated to continuing operations. That modification of the incremental approach is to be consistent with the approach in Subtopic 740-10 to consider the tax consequences of taxable income expected in future years in assessing the realizability of deferred tax assets. Application of this modification makes it appropriate to consider a gain on discontinued operations in the current year for purposes of allocating a tax benefit to a current-year loss from continuing operations.~~

11. Amend paragraphs 740-20-55-10 through 55-12 and their related heading and 740-20-55-14 and add paragraphs 740-20-55-12A through 55-12C and their related heading, with a link to transition paragraph 740-10-65-9, as follows:

Implementation Guidance and Illustrations

> Illustrations

> > Example 2: Allocations of Income Taxes to Continuing Operations and One Other Item

> > > Case A: Loss from Continuing Operations with a Gain on Discontinued Operations (Tax Benefit Realizable)

740-20-55-10 This Case illustrates allocation of income tax expense if there is only one item other than income from continuing operations. The assumptions are as follows:

- a. The entity's pretax financial income and **taxable income** are the same.
- b. The entity's ordinary loss from continuing operations is \$500.
- c. The entity also has a gain on discontinued operations of \$900 that is a capital gain for tax purposes.
- d. The tax rate is 40 percent on ordinary income and 30 percent on capital gains. **Income taxes currently payable** are \$120 (\$400 at 30 percent).
- e. The entity has determined that the deferred tax asset that would have resulted from the loss from continuing operations if the gain on

discontinued operations had not occurred would be expected to be realized (that is, a valuation allowance would not have been needed).

740-20-55-11 Income tax expense is allocated between the pretax loss from operations and the gain on discontinued operations as follows.

Total income tax expense	\$ 120
Tax benefit allocated to the loss from operations	(150) <u>(200)</u>
Incremental tax expense allocated to the gain on discontinued operations	\$ 270 <u><u>\$ 320</u></u>

740-20-55-12 The effect of the \$500 loss from continuing operations was to offset an equal amount of capital gains that otherwise would be taxed at a 30 percent tax rate. However, paragraph 740-20-45-7 requires that an entity determine the tax effects of pretax income from continuing operations by a computation that does not consider the tax effects of items that are not included in continuing operations. The entity has determined that, absent the capital gain from discontinued operations, a valuation allowance would not have been needed on the deferred tax asset resulting from the \$500 loss from continuing operations. Thus, ~~\$150~~ ~~(\$500 at 30 percent)~~ \$200 ~~(\$500 at 40 percent)~~ of tax benefit is allocated to continuing operations. The ~~\$270~~ \$320 incremental effect of the gain on discontinued operations is the difference between \$120 of total tax expense and the ~~\$150~~ \$200 tax benefit from continuing operations.

> > > Case A1: Loss from Continuing Operations with a Gain on Discontinued Operations (Tax Benefit Not Realizable)

740-20-55-12A Case A1 illustrates allocation of income tax expense if there is only one item other than income from continuing operations. The assumptions are the same as in Case A except that the entity has determined that the deferred tax asset that would have resulted from the loss from continuing operations if the gain on discontinued operations had not occurred would not be expected to be realized (that is, a valuation allowance would have been needed).

740-20-55-12B Income tax expense is allocated between the pretax loss from operations and the gain on discontinued operations as follows.

Total income tax expense	<u>\$ 120</u>
Tax benefit allocated to the loss from operations	<u>-</u>
Incremental tax expense allocated to the gain on discontinued operations	<u><u>\$ 120</u></u>

740-20-55-12C The effect of the \$500 loss from continuing operations was to offset an equal amount of capital gains that otherwise would be taxed at a 30 percent tax rate. However, paragraph 740-20-45-7 requires that an entity determine the tax effects of pretax income from continuing operations by a computation that does not consider the tax effects of items that are not included in continuing operations. The entity has determined that, absent the capital gain from discontinued operations, a valuation allowance would have been needed on the deferred tax asset resulting from the \$500 loss from continuing operations. Thus, zero tax benefit is allocated to continuing operations. The \$120 incremental effect of the gain on discontinued operations is the difference between \$120 of total tax expense and the zero tax benefit from continuing operations.

>> **Case B: Income from Continuing Operations with a Loss from Discontinued Operations**

740-20-55-13 This Case further illustrates the general requirement to determine the tax effects of pretax income from continuing operations by a computation that does not consider the tax effects of items that are not included in continuing operations.

740-20-55-14 To illustrate, assume that in the current year an entity has \$1,000 of income from continuing operations and a \$1,000 loss from discontinued operations. At the beginning of the year, the entity has a \$2,000 net operating loss carryforward for which the deferred tax asset, net of its **{remove glossary link}valuation allowance{remove glossary link}**, is zero, and the entity did not reduce that valuation allowance during the year. No tax expense should be allocated to income from continuing operations because the \$2,000 loss carryforward is sufficient to offset that income. Thus, no tax benefit is allocated to the loss from discontinued operations. ~~See paragraph 740-20-45-7 for the exception to the general requirement when an entity has a loss from continuing operations.~~

Amendments to Subtopic 740-30

12. Amend paragraph 740-30-25-15 and supersede paragraph 740-30-25-16, with a link to transition paragraph 740-10-65-9, as follows:

Income Taxes—Other Considerations or Special Areas

Recognition

>> Ownership Changes in Investments

740-30-25-15 An investment in common stock of a subsidiary may change so that it is no longer a subsidiary because the parent entity sells a portion of the investment, the subsidiary sells additional stock, or other transactions affect the investment. ~~If the remaining investment in common stock shall be accounted for by the equity method, the investor shall recognize income taxes on its share of current earnings of the investee entity in accordance with the provisions of Subtopic 740-10. If a parent entity did not recognize income taxes on its equity in undistributed earnings of a subsidiary for the reasons cited in paragraph 740-30-25-17 (and the entity in which the investment is held ceases to be a subsidiary), it shall accrue as a current period expense income taxes on the temporary difference related to its remaining investment in common stock in accordance with the guidance in Subtopic 740-10. undistributed earnings in the period that it becomes apparent that any of those undistributed earnings (prior to the change in status) will be remitted. The change in the status of an investment would not by itself mean that remittance of those undistributed earnings shall be considered apparent. If a parent entity recognizes a deferred tax liability for the temporary difference arising from its equity in undistributed earnings of a subsidiary and subsequently reduces its investment in the subsidiary through a taxable sale or other transaction, the amount of the temporary difference and the related deferred tax liability will change.~~

740-30-25-16 ~~Paragraph superseded by Accounting Standards Update No. 2019-XX. An investment in common stock of an investee (other than a subsidiary or corporate joint venture) may change so that the investee becomes a subsidiary because the investor acquires additional common stock, the investee acquires or retires common stock, or other transactions affect the investment. A temporary difference for the investor's share of the undistributed earnings of the investee prior to the date it becomes a subsidiary shall continue to be treated as a temporary difference for which a deferred tax liability shall continue to be recognized to the extent that dividends from the subsidiary do not exceed the parent entity's share of the subsidiary's earnings subsequent to the date it became a subsidiary.~~

13. Amend paragraph 740-30-45-3, with a link to transition paragraph 740-10-65-9, as follows:

Other Presentation Matters

> Undistributed Earnings of Subsidiaries and Corporate Joint Ventures

740-30-45-3 If a parent entity did not recognize income taxes on its equity in undistributed earnings of a subsidiary for the reasons cited in paragraph 740-30-25-17 and the entity in which the investment is held ceases to be a subsidiary, paragraph 740-30-25-15 requires that it shall accrue as a current period expense income taxes on the temporary difference related to its remaining investment in

~~common stock in accordance with the guidance in Subtopic 740-10 undistributed earnings in the period that it becomes apparent that any of those undistributed earnings prior to the change in status will be remitted.~~

Amendments to Subtopic 740-270

14. Amend paragraph 740-270-25-5, with a link to transition paragraph 740-10-65-9, as follows:

Income Taxes—Interim Reporting

Recognition

> General Recognition Approach

740-270-25-5 The effects of new tax legislation shall not be recognized prior to enactment. The tax effect of a change in tax laws or rates ~~on taxes currently payable or refundable for the current year shall be recorded after the effective dates prescribed in the statutes and~~ shall be reflected in the computation of the annual effective tax rate beginning ~~no earlier than~~ in the first interim period that includes the enactment date of the new legislation. The effect of a change in tax laws or rates on a **deferred tax liability** or asset shall not be apportioned among interim periods through an adjustment of the annual effective tax rate.

15. Amend paragraphs 740-270-30-11, 740-270-30-28, and 740-270-30-34, with a link to transition paragraph 740-10-65-9, as follows:

Initial Measurement

> Exclusion of Items from Estimated Annual Effective Tax Rate

> > Items Always Excluded from Estimated Annual Effective Tax Rate

740-270-30-11 The effects of changes in judgment about beginning-of-year valuation allowances and effects of changes in tax laws or rates on deferred tax assets or liabilities and taxes payable or refundable (in the case of a retroactive change) shall be excluded from the estimated annual effective tax rate calculation. ~~See paragraph 740-270-25-5 for requirements related to when the estimated annual effective tax rate shall be adjusted to reflect changes in tax laws and rates that affect current year taxes payable or refundable.~~

> Effect of Operating Losses

> > Year-to-Date Ordinary Loss; Anticipated Ordinary Loss for the Year

740-270-30-28 If an entity has an ordinary loss for the year to date at the end of an interim period and anticipates an ordinary loss for the fiscal year, the interim period tax benefit shall be computed in accordance with paragraph 740-270-30-5. The estimated tax benefit for the fiscal year, used to determine the estimated annual effective tax rate described in paragraphs 740-270-30-6 through 30-8, shall not exceed the tax benefit determined in accordance with paragraphs 740-270-30-30 through 30-33. ~~In addition to that limitation in the effective rate computation, if the year-to-date ordinary loss exceeds the anticipated ordinary loss for the fiscal year, the tax benefit recognized for the year to date shall not exceed the tax benefit determined, based on the year-to-date ordinary loss, in accordance with paragraphs 740-270-30-30 through 30-33.~~

> Determining Income Tax Benefit Limitations

740-270-30-34 See Example 2, Cases A1 and A2; B, C4; and C1 and C2 (paragraphs 740-270-55-15 through 55-17; ~~740-270-55-17~~; and 740-270-55-19 through 55-20) for illustrations of computations involving operating losses, and Example 1, Cases B2 and B3 (see paragraphs 740-270-55-7 through 55-8), ~~and Example 2, Case A2 (see paragraph 740-270-55-16)~~ for illustrations of special year-to-date limitation computations.

16. Amend paragraphs 740-270-55-16, 740-270-55-44, and 740-270-55-49 and the heading preceding paragraph 740-270-55-50, with a link to transition paragraph 740-10-65-9, as follows:

Implementation Guidance and Illustrations

> Illustrations

> > Example 2: Accounting for Income Taxes Applicable to Ordinary Income (or Loss) at an Interim Date If an Ordinary Loss Is Anticipated for the Fiscal Year

> > > Case A: Realization of the Tax Benefit of the Loss Is More Likely Than Not

> > > Case A2: Ordinary Income and Losses in Interim Periods

740-270-55-16 The entity has ordinary income and losses in interim periods and for the year to date. The full tax benefit of the anticipated ordinary loss and the anticipated tax credits will be realized by carryback. The full tax benefit of the

maximum year-to-date ordinary loss can also be realized by carryback. Quarterly tax computations are as follows.

Reporting Period	Ordinary Income (Loss)		Estimated Annual Effective Tax Rate	Tax (or Benefit)			Reporting Period
	Reporting Period	Year-to-Date		Year-to-Date		Less Previously Provided	
				Computed-Year-to-Date	Limited to		
First quarter	\$ 20,000	\$ 20,000	60%	\$ 12,000		\$ -	\$ 12,000
Second quarter	(80,000)	(60,000)	60%	(36,000)		12,000	(48,000)
Third quarter	(80,000)	(140,000)	60%	(84,000)	\$ (80,000) ^(a)	(36,000)	(48,000)
Fourth quarter	40,000	(100,000)	60%	(60,000)		(80,000)	24,000
Fiscal year	\$ (100,000)					(84,000)	\$ (60,000)

^(a) Footnote superseded by Accounting Standards Update No. 2019-XX. Because the year-to-date ordinary loss exceeds the anticipated ordinary loss for the fiscal year, the tax benefit recognized for the year-to-date is limited to the amount that would be recognized if the year-to-date ordinary loss were the anticipated ordinary loss for the fiscal year. The limitation is computed as follows:

Year-to-date ordinary loss times the statutory rate (\$140,000 at 50%)	\$ (70,000)
Estimated tax credits for the year	(10,000)
Year-to-date benefit limited to	<u>\$ (80,000)</u>

>> Example 6: Effect of New Tax Legislation

740-270-55-44 The following Cases illustrate the guidance in paragraphs 740-270-25-5 through 25-6 for accounting in interim periods for the effect of new tax legislation on income taxes:

- Legislation effective in a future interim period (Case A)
- Effective date of new legislation that is administratively effective (Case B).

>>> Case A: Legislation Effective in a Future Interim Period

740-270-55-45 The assumed facts applicable to this Case follow.

740-270-55-46 For the full fiscal year, an entity anticipates ordinary income of \$100,000. All income is taxable in one jurisdiction at a 50 percent rate. Anticipated tax credits for the fiscal year total \$10,000. No events that do not have tax consequences are anticipated.

740-270-55-47 Computation of the estimated annual effective tax rate applicable to ordinary income is as follows.

Tax at statutory rate (\$100,000 at 50%)	\$50,000
Less anticipated tax credits	(10,000)
Net tax to be provided	<u>\$40,000</u>
Estimated annual effective tax rate (\$40,000 ÷ \$100,000)	<u>40%</u>

740-270-55-48 Further, assume that new legislation creating additional tax credits is enacted during the second quarter of the entity’s fiscal year. The new legislation is effective on the first day of the third quarter. As a result of the estimated effect of the new legislation, the entity revises its estimate of its annual effective tax rate to the following.

Tax at statutory rate (\$100,000 at 50%)	\$ 50,000
Less anticipated tax credits	<u>(12,000)</u>
Net tax to be provided	<u>\$ 38,000</u>
 Estimated annual effective tax rate (\$38,000 ÷ \$100,000)	 <u><u>38%</u></u>

740-270-55-49 The effect of the new legislation shall ~~not be reflected until it is effective or administratively effective~~ in the computation of the annual effective tax rate beginning in the first interim period that includes the enactment date of the new legislation. Accordingly, quarterly tax computations are as follows.

Reporting Period	Ordinary Income		Estimated Annual Effective Tax Rate	Tax		
	Reporting Period	Year-to-Date		Year-to-Date	Less Previously Provided	Reporting Period
First quarter	\$ 20,000	\$ 20,000	40%	\$ 8,000	\$ -	\$ 8,000
Second quarter	20,000	40,000	40% 38%	16,000 15,200	8,000	8,000 7,200
Third quarter	20,000	60,000	38%	22,800	15,200	6,000 7,600
Fourth quarter	<u>40,000</u>	100,000	38%	38,000	22,800	<u>15,200</u>
Fiscal year	<u>\$ 100,000</u>					<u>\$ 38,000</u>

> > > Case B: Effective Date of New Legislation That Is Administratively Effective

740-270-55-50 Legislation generally becomes effective on the date prescribed in the statutes. However, tax legislation may prescribe changes that become effective during an entity’s fiscal year that are administratively implemented by applying a portion of the change to the full fiscal year. For example, if the statutory tax rate applicable to calendar-year corporations were increased from 48 to 52 percent, effective January 1, the increased statutory rate might be administratively applied to a corporation with a fiscal year ending at June 30 in the year of the change by applying a 50 percent rate to its **taxable income** for the fiscal year, rather than 48 percent for the first 6 months and 52 percent for the last 6 months. In that case the legislation becomes effective for that entity at the beginning of the entity’s fiscal year.

Amendments to Subtopic 323-740

17. Amend paragraph 323-740-25-6, with a link to transition paragraph 740-10-65-9, as follows:

Investments—Equity Method and Joint Ventures—Income Taxes

Recognition

Qualified Affordable Housing Project Investments

323-740-25-6 Example 1 (see paragraph 323-740-55-2) illustrates the application of accounting guidance to a limited partnership investment in a qualified affordable housing project using the cost, ~~equity~~, and proportional amortization methods.

18. Amend paragraph 323-740-30-2, with a link to transition paragraph 740-10-65-9, as follows:

Initial Measurement

Qualified Affordable Housing Project Investments

323-740-30-2 Example 1 (see paragraph 323-740-55-2) illustrates the application of accounting guidance to a limited partnership investment in a qualified affordable housing project using the cost, ~~equity~~, and proportional amortization methods.

19. Amend paragraph 323-740-35-3, with a link to transition paragraph 740-10-65-9, as follows:

Subsequent Measurement

Qualified Affordable Housing Project Investments

323-740-35-3 Example 1 (see paragraph 323-740-55-2) illustrates the application of accounting guidance to a limited liability investment in a qualified affordable housing project using the cost, ~~equity~~, and proportional amortization methods.

20. Amend paragraph 323-740-45-3, with a link to transition paragraph 740-10-65-9, as follows:

Other Presentation Matters

Qualified Affordable Housing Project Investments

323-740-45-3 Example 1 (see paragraph 323-740-55-2) illustrates the application of accounting guidance to a limited partnership investment in a qualified affordable housing project using the cost, ~~equity~~, and proportional amortization methods.

21. Amend paragraph 323-740-55-2 and supersede paragraphs 323-740-55-8 through 55-9, with a link to transition paragraph 740-10-65-9, as follows:

Implementation Guidance and Illustrations

Qualified Affordable Housing Project Investments

> Illustrations

> > Example 1: Application of Accounting Guidance to a Limited Partnership Investment in a Qualified Affordable Housing Project

323-740-55-2 This Example illustrates the application of the cost-, equity-, and proportional amortization methods of accounting for a limited liability investment in a qualified affordable housing project.

323-740-55-8 Paragraph superseded by Accounting Standards Update No. 2019-XX. A detailed analysis of the equity method follows.

Year	Net- Investment (1)	Book-Loss (2)	Tax-Loss- (Depreciation) (3)	Tax-Credits (4)	Current-Tax- Benefit (5)	Deferred-Tax- Benefit- (Expense) (6)	Impact-on-Net- Income (7)

2	85,454	7,273	7,273	8,000	10,909		3,636
3	78,181	7,273	7,273	8,000	10,909		3,636
4	70,908	7,273	7,273	8,000	10,909		3,636
5	63,635	7,273	7,273	8,000	10,909		3,636
6	56,362	7,273	7,273	8,000	10,909		3,636
7	49,089	7,273	7,273	8,000	10,909		3,636
8	41,816	7,273	7,273	8,000	10,909		3,636
9 ^(a)	16,000	25,816	7,273	8,000	10,909	\$ 7,418	(7,489)
10		16,000	7,273	8,000	10,909	3,492	(1,599)
11			7,273		2,909	(2,909)	
12			7,273		2,909	(2,909)	
13			7,273		2,909	(2,909)	
14			6,461		2,183	(2,183)	
15							
Total		\$ 100,000	\$ 100,000	\$ 80,000	\$ 120,000	\$ 0	\$ 20,000

- (1) End-of-year investment for a 5-percent limited liability interest in the project less the investor's share of losses.
- (2) The investor's share of book losses recognized under the equity method. The cumulative losses recognized are limited to the investment of \$100,000. (See also (a) below)
- (3) Depreciation (on \$200,000 tax basis of the underlying assets) using the straight-line method over 27.5 years up to the amount of the initial investment of \$100,000.
- (4) 4 percent tax credit on \$200,000 tax basis of the underlying assets.
- (5) (Column [3] x 40% tax rate) + column (4).
- (6) The change in deferred taxes resulting from differences between the book and tax bases of the investment and tax losses in excess of the at-risk investment. In this Example, that amount can be determined as follows: (column [2] - column [3]) x 40% tax rate.
- (7) Column (5) + column (6) - column (2).
- (a) Projections of future operating results at the end of Year 9 indicate that a net loss will be recognized over the remaining term of the investment indicating a need to assess the investment for impairment. For purposes of this Example, impairment is measured based on the remaining tax credits allocable to the investor, although an alternative measure could include other tax benefits to be generated by the investment. The impairment loss recognized in this Example (\$18,543) is derived as follows: Investment at the end of Year 9 (\$41,816) less the loss recognized in Year 9 (\$7,273), the remaining tax credits allocable to the investor (\$16,000), and the estimated residual value (\$0).

323-740-55-9 Paragraph superseded by Accounting Standards Update No. 2019-XX. This Example is but one method for recognition and measurement of impairment of an investment accounted for by the equity method. Inclusion of this method in this Example does not indicate that it is a preferred method.

Amendments to Subtopic 718-740

22. Amend paragraph 718-740-45-7, with a link to transition paragraph 740-10-65-9, as follows:

Compensation—Stock Compensation—Income Taxes

Other Presentation Matters

> Employee Stock Ownership Plans

718-740-45-7 The tax benefit of tax-deductible dividends on allocated and unallocated **employee stock ownership plan** shares shall be recognized in ~~the income statement~~ income taxes allocated to continuing operations.

The amendments in this proposed Update were approved for publication by the unanimous vote of the six members of the Financial Accounting Standards Board:

Russell G. Golden, *Chairman*
James L. Kroeker, *Vice Chairman*
Christine A. Botosan
Gary R. Buesser
Marsha L. Hunt
R. Harold Schroeder

Background Information and Basis for Conclusions

Introduction

BC1. The following summarizes the Board's considerations in reaching the conclusions in this proposed Update. It includes reasons for accepting certain approaches and rejecting others. Individual Board members gave greater weight to some factors than to others.

BC2. The amendments in this proposed Update would simplify the accounting for income taxes by removing certain exceptions in Topic 740, including the exceptions to:

- a. The incremental approach for intraperiod tax allocation when there is a loss from continuing operations and income or a gain from other items (for example, discontinued operations or other comprehensive income)
- b. The requirement to recognize a deferred tax liability for equity method investments when a foreign subsidiary becomes an equity method investment
- c. The ability not to recognize a deferred tax liability for a foreign subsidiary when a foreign equity method investment becomes a subsidiary
- d. The general methodology for calculating income taxes in an interim period when a year-to-date loss exceeds the anticipated loss for the year.

BC3. The amendments in this proposed Update also would simplify the accounting for income taxes by:

- a. Requiring that an entity recognize a franchise tax (or similar tax) that is partially based on income in accordance with Topic 740 and account for any incremental amount incurred as a non-income-based tax
- b. Requiring that an entity evaluate when a step up in the tax basis of goodwill should be considered part of the business combination in which the book goodwill was originally recognized and when it should be considered a separate transaction
- c. Specifying that an entity is not required to allocate the consolidated amount of current and deferred tax expense to a legal entity that is not subject to tax but that an entity may elect to do so for a legal entity that is disregarded by the taxing authority
- d. Requiring that an entity reflect the effect of an enacted change in tax laws or rates in the annual effective tax rate computation in the interim period that includes the enactment date
- e. Making minor Codification improvements for income taxes related to employee stock ownership plans and investments in qualified affordable housing projects accounted for using the equity method.

Background Information

BC4. The Board is issuing the amendments in this proposed Update as part of its Simplification Initiative. The objective of the Simplification Initiative is to identify, evaluate, and improve areas of GAAP for which cost and complexity can be reduced while maintaining or improving the usefulness of the information provided to users of financial statements. The specific areas of potential simplification were submitted by stakeholders as part of the Simplification Initiative.

Benefits and Costs

BC5. The objective of financial reporting is to provide information that is useful to present and potential investors, creditors, donors, and other capital market participants in making rational investment, credit, and similar resource allocation decisions. However, the benefits of providing information for that purpose should justify the related costs. Present and potential investors, creditors, donors, and other users of financial information benefit from improvements in financial reporting, while the costs to implement new guidance are borne primarily by present investors. The Board's assessment of the costs and benefits of issuing new guidance is unavoidably more qualitative than quantitative because there is no method to objectively measure the costs to implement new guidance or to quantify the value of improved information in financial statements.

BC6. The amendments in this proposed Update would reduce cost and complexity by removing certain exceptions from and clarifying other areas of Topic 740. The proposed amendments would eliminate the need for an entity to analyze whether the exceptions for intraperiod tax allocation, ownership changes in investments, and year-to-date losses that exceed anticipated losses apply in a given period. The proposed amendments also would provide the benefit of improving consistent application of and simplifying GAAP for (a) franchise taxes that are partially based on income, (b) transactions that result in a step up in the tax basis of goodwill, (c) separate financial statements of legal entities that are not subject to tax, and (d) enacted changes in tax laws in interim periods by clarifying and amending guidance that already exists within GAAP. The proposed amendments would not create new accounting requirements not previously included in Topic 740.

Basis for Conclusions

Franchise Taxes That Are Partially Based on Income

BC7. Franchise taxes in certain jurisdictions are calculated using the greater of two calculations—one based on income and one based on items other than income (for example, capital, capital expenditures, and gross revenue). Paragraph 740-10-15-4(a) currently states that Topic 740 does not apply to franchise taxes based

on capital when there is no additional tax based on income. That paragraph further states that if there is a tax based on income that is in excess of the tax based on capital, then that excess is subject to the guidance in Topic 740. That guidance results in an entity separating the component of the tax based on items other than income from the component of the tax based on income when the income tax is greater than the tax on items other than income. Taxes based on items other than income generally should not be included in the income tax line on the financial statements. Stakeholders indicated that the guidance for these types of franchise taxes increases the cost and complexity of applying Topic 740, particularly when the amount related to the non-income-based tax is not significant, and that the guidance does not result in increased usefulness to users of financial statements. In many cases, the tax amount based on amounts other than income (for example, capital) generally is only significant if that amount is greater than the income tax amount. That is because an entity is likely operating at a loss or near the break-even point in those situations. Stakeholders also indicated that this guidance introduces complexity in determining which rate to use when recording deferred taxes on temporary differences. For example, in cases in which the state tax is an income tax only to the extent that it exceeds the capital-based tax in a given year, deferred taxes would be recognized for temporary differences that reverse in future years for which annual taxable income is expected to exceed the capital tax.

BC8. The Board decided to amend paragraph 740-10-15-4(a) to require that if a franchise tax (or similar tax) is partially based on income (for example, the entity pays the greater of an income-based tax and a non-income-based tax), deferred tax assets and liabilities should be recognized and accounted for in accordance with Topic 740. The amount of current tax expense that is based on income should be accounted for in accordance with Topic 740, with any incremental amount incurred recorded as a non-income-based tax. The Board decided that this proposed amendment would simplify Topic 740 and reduce the cost of applying the guidance in that Topic when the amounts for those types of franchise taxes are not significant because an entity would need to separate the tax on amounts other than income only if that amount is greater than the income tax amount. Additionally, the Board noted that an entity would not need to consider whether temporary differences would reverse in years in which the entity pays a tax that is based on amounts other than income when measuring its deferred taxes. The Board noted that this decision is consistent with the accounting for other incremental taxes (for example, the base erosion anti-abuse tax). The Board decided that this proposed amendment would, at a minimum, maintain the decision-useful information provided to users and may increase it. Additionally, applying the disclosure requirements in Topic 740 to these amounts could result in greater transparency of franchise tax amounts.

Transactions That Result in a Step Up in the Tax Basis of Goodwill

BC9. An entity may enter into a transaction with a government in its capacity as a taxing authority that results in an increase in the tax basis of assets of the entity. For example, tax laws in a foreign country may allow an entity to elect to step up the tax basis of certain fixed assets to fair value in exchange for a current payment to the government. This step up also could be acquired by sacrificing existing tax attributes (for example, a net operating loss carryforward or tax basis in another asset). In certain situations, the step up in the tax basis as a result of the transaction with the government results in a step up to the tax basis of goodwill. If the step up in the tax basis of goodwill relates to the portion of goodwill from a prior business combination for which a deferred tax liability was not recognized, then paragraph 740-10-25-54 prohibits the entity from recognizing a deferred tax asset for the increase in tax basis, except to the extent that the tax-deductible goodwill exceeds the remaining book balance of goodwill. Therefore, an entity would not record a deferred tax asset for the step up in basis of goodwill unless it would have recorded a deferred tax asset when the business combination had occurred.

BC10. Stakeholders indicated that the guidance in paragraph 740-10-25-54 that prohibits an entity from recognizing a deferred tax asset for the acquisition of a step up in the tax basis of goodwill may result in an outcome that does not represent the economics of the transaction. That is because an asset on the entity's statement of financial position (for example, cash or deferred tax assets for other tax attributes) would be sacrificed to obtain that benefit but the asset would be immediately expensed. For example, if an entity exchanges a net operating loss carryforward for the step up in tax basis of goodwill, it would reduce the balance of its deferred tax assets and recognize a corresponding expense. Those stakeholders indicated that, in this case, economically, the entity has exchanged one deferred tax asset (the net operating loss carryforward) for another deferred tax asset (the step up in tax basis of goodwill). Accordingly, the entire amount of the transaction should not be recognized in the income statement. Those stakeholders noted that these transactions often are separate transactions even though they affect the goodwill recognized in the business combination. However, those stakeholders acknowledged that in certain cases the step up in tax basis of goodwill relates to the business combination in which the book goodwill was originally recognized, in which case prohibiting the recognition of a deferred tax asset would be consistent with the guidance in Topic 805, Business Combinations. That is because the entity has actually exchanged one deferred tax asset (for example, a net operating loss carryforward) for a reduction in a deferred tax liability related to goodwill that was not recognized upon the acquisition of the business. Furthermore, stakeholders indicated that it can be difficult to determine whether new tax-deductible goodwill relates to the business combination in which the goodwill was initially recognized in the financial statements because there often is a significant amount of time between the two transactions or a realignment of the original book goodwill between reporting units may have occurred.

BC11. The Board decided that clarifying the guidance about whether a step up in the tax basis of goodwill relates to the business combination in which the book goodwill was originally recognized would reduce the cost of applying Topic 740 and indicate that a separate transaction may affect goodwill. Therefore, the Board decided to remove the prescriptive guidance in paragraph 740-10-25-54 and require that an entity determine whether the tax basis step-up transaction relates to the business combination in which the book goodwill was originally recognized (in which case a deferred tax asset would not be recognized unless the newly deductible goodwill exceeds the remaining balance of book goodwill) or to a separate transaction (in which case a deferred tax asset would be recognized) on the basis of certain indicators. The Board acknowledged that judgment still would be needed to determine whether the transaction relates to the business combination in which the goodwill was originally recognized or whether it relates to a separate transaction. Therefore, the Board decided to provide indicators for making that determination. The Board noted that the indicators included in the proposed amendment to paragraph 740-10-25-54 would delineate transactions that were contemplated as part of the business combination from separate transactions that are entered into significantly after the business combination and that have economic consequences. The Board decided that the proposed amendment would better reflect the economic consequences of separate transactions because it would result in the recognition of an asset instead of expense when the step up in tax basis results in a future tax benefit.

Separate Financial Statements of Legal Entities Not Subject to Tax

BC12. Topic 740 requires that the consolidated amount of current and deferred tax expense for a group that files a consolidated tax return be allocated among the members of the group when those members issue separate financial statements. Unlike a member of a group that files a consolidated tax return, a single-member limited liability company that is disregarded for tax purposes generally is not severally liable for the taxes of its taxable owner. Therefore, stakeholders indicated that some entities do not allocate the consolidated amount of current and deferred taxes to single-member limited liability companies that are disregarded entities in their separate financial statements while other entities do.

BC13. The Board noted that allocating income taxes to single-member limited liability companies that are disregarded entities in separate financial statements adds to the cost and complexity of applying Topic 740. The Board noted that a single-member limited liability company is a separate legal entity that is not severally liable for the taxes of its owner, so the Board decided that the entity should not be required to include allocated income taxes in its separate financial statements. However, the Board also noted that some entities that are not subject to tax and are disregarded by the taxing authority (for example, certain rate-regulated entities or entities with cost-plus revenue arrangements) may want to include income taxes in their separate financial statements to reflect an allocation

of the tax costs incurred by the consolidating parent entity. Therefore, the Board decided to clarify that an entity is not required to allocate amounts of consolidated current and deferred taxes to a legal entity that is not subject to tax (including a single-member limited liability company) in its separate financial statements, but an entity may elect to do so for a legal entity that is disregarded by the taxing authority. The Board noted that this would clarify how all pass-through entities that are subsidiaries of taxable entities are treated under Topic 740. The Board noted that the separate financial statements of an entity that is not subject to tax that does not include allocated income taxes would provide financial statement users with information that is consistent with the economics of the entity because the income of a single-member limited liability company would flow through to the owner of the entity (that is, the parent entity) for tax purposes and would not be taxed at the entity level. Additionally, a liability for income taxes for which the single-member limited liability company is not liable does not meet the conceptual definition of a liability. The Board observed that paragraph 740-10-50-16 requires that an entity disclose that it is not subject to income taxes, which would provide financial statement users with information about the tax status of the entity. The Board also decided to require additional disclosures for an entity that is not subject to tax and that is disregarded by the taxing authority that elects to include the allocated amount of current and deferred tax expense in its separately issued financial statements by requiring that the entity disclose that fact and provide the disclosures required by paragraph 740-10-50-17.

Intraperiod Tax Allocation

BC14. Intraperiod tax allocation is the process of allocating total tax expense or benefit to components of the income statement (such as continuing operations and discontinued operations) and directly to shareholders' equity and other comprehensive income. Total tax expense generally is allocated by first determining the amount of tax expense or benefit allocated to continuing operations and then proportionally allocating the remaining tax expense or benefit to items other than continuing operations. Generally, the tax effect of income from continuing operations should be determined without considering the tax effect of items that are not included in continuing operations. Paragraph 740-20-45-7 provides an exception to this general approach by requiring that all components, including discontinued operations and items charged or credited directly to equity, be considered when determining the tax benefit from a loss from continuing operations. This exception applies only when there is a current-period loss from continuing operations. Application of this exception makes it appropriate to consider gain or income outside continuing operations (for example, one recognized in other comprehensive income) in the current year for purposes of allocating a tax benefit to a current-year loss from continuing operations. For example, an entity may consider the gain or income outside continuing operations to determine whether a valuation allowance needs to be recognized for purposes of allocating the tax benefit to continuing operations.

BC15. The Financial Accounting Foundation's *Post-Implementation Review Report on FASB Statement No. 109, Accounting for Income Taxes*, indicated that some preparers and auditors have difficulty applying certain aspects of the requirements in Topic 740 about intraperiod tax allocation. Stakeholders indicated that the exception to the incremental approach for intraperiod tax allocation (see paragraph 740-20-45-7) creates counterintuitive outcomes because it results in a benefit being allocated to continuing operations and an offsetting tax expense in another component, even when total tax expense is zero. Stakeholders also indicated that this exception is difficult to apply, is often overlooked, and does not provide any perceived benefit to users. Additionally, stakeholders observed that there is diversity in practice in how the guidance in paragraph 740-20-45-7 is interpreted. Some entities have interpreted the guidance to apply if there is a loss from continuing operations and any one category below continuing operations is in a gain position, whereas others have interpreted it to apply only when the sum of all categories below continuing operations is in an overall gain position. For those reasons, the Board decided that removing the exception to the incremental approach for intraperiod tax allocation would reduce the cost of applying Topic 740, while not significantly altering the information provided to users of financial statements.

Ownership Changes in Investments

BC16. Topic 740 provides income tax guidance for situations in which an investment in common stock of a subsidiary changes so that it is no longer a subsidiary. If the parent entity did not recognize income taxes on its undistributed earnings because of the assertion that earnings were indefinitely reinvested or would be remitted in a tax-free liquidation, paragraph 740-30-25-15 requires that the outside basis difference be frozen (and no deferred tax liability is recognized on the basis difference that exists as of that date) until the period when it becomes apparent that any of the undistributed earnings will be remitted. That guidance states that transitioning from a subsidiary to an equity method investment would not by itself mean that remittance of the undistributed earnings must be considered apparent. The entity recognizes deferred taxes and income tax expense (or benefit) on any basis differences that occur after the subsidiary becomes an equity method investment.

BC17. The Board noted that the current guidance that requires an entity to freeze the outside basis difference of a subsidiary that becomes an equity method investment represents an exception to the general principle for accounting for outside basis differences of equity method investments. The Board decided that this exception increases the cost and complexity of applying Topic 740 because the exception applies to only a portion of the outside basis difference of the equity method investment, so an entity is required to track the frozen amount and any subsequent changes to the outside basis separately. The Board also noted that the exception reduces the comparability of the accounting for income tax effects of equity method investments for financial statement users because the income

tax effects of equity method investments are only recognized for certain equity method investments (or portions of certain equity method investments). Therefore, the Board decided to align the accounting for income tax effects of equity method investments by removing the exception in paragraph 740-30-25-15.

BC18. Topic 740 also provides income tax guidance for situations in which a foreign equity method investment becomes a subsidiary. Under current guidance in paragraph 740-30-25-16, the deferred tax liability previously recognized for a foreign equity method investment cannot be derecognized when the investment becomes a subsidiary—even if the entity asserts that earnings are indefinitely reinvested or will be remitted in a tax-free liquidation—unless dividends received from the subsidiary exceed earnings from the subsidiary after the date it became a subsidiary.

BC19. The Board noted that the current guidance that requires an entity to freeze the outside basis difference of a foreign equity method investment that becomes a subsidiary represents an exception to the general principle for accounting for outside basis differences of foreign subsidiaries. The Board decided that this exception increases the cost and complexity of applying Topic 740 because the exception applies to only a portion of the outside basis difference of the foreign subsidiary, so an entity is required to track the frozen amount and any subsequent changes to the outside basis separately. The Board also noted that the exception reduces the comparability across entities of the accounting for income tax effects of foreign subsidiaries for which the earnings are indefinitely reinvested because the income tax effects of a portion of a foreign subsidiary are recorded while another portion is not. This lack of comparability reduces the usefulness of the information for financial statement users. Therefore, the Board decided to align the accounting for income tax effects of foreign subsidiaries by removing the exception in paragraph 740-30-25-16.

Enacted Changes in Tax Laws in Interim Periods

BC20. Topic 740 requires that an entity recognize the income tax effects of an enacted change in tax law on deferred tax assets or liabilities on the date of enactment. However, under the interim-period income tax model, the tax effect of a change in tax law on taxes payable or refundable for the current year should be recorded after the effective date of the tax law. Because of the use of the term *effective date*, a tax law enacted at the beginning of the year with an effective date in the middle of the year would result in an entity recognizing the effect of the enacted tax law in the period of enactment for deferred tax assets and liabilities, but the enacted tax law would not affect the annual effective tax rate (used in the interim-period income tax model) until the period that includes the effective date of the tax law.

BC21. Stakeholders indicated that applying the guidance on the effect of an enacted change in tax law is difficult in practice because of how income taxes in interim financial statements are calculated. The interim reporting guidance in

Subtopic 740-270 does not require that an entity separately recognize current tax expense and deferred tax expense in interim periods. An entity generally estimates the annual effective tax rate on the basis of an annual forecast of its income and an estimation of expected permanent differences. The entity then applies the annual effective tax rate to the year-to-date income and makes a reasonable allocation of the expense to current taxes payable and deferred taxes. An entity generally does not estimate temporary differences for the purpose of income tax accounting in an interim period. Stakeholders noted that the requirement to wait until the effective date to recognize the effects of the enacted change in tax law on current taxes payable requires that an entity make a more precise estimate of the allocation between current taxes and deferred taxes because an entity is required to wait until the effective date to recognize the effects of the enacted change in tax law on current taxes payable while recognizing the effects of the change on deferred taxes on the enactment date. The Board observed that this results in increased costs for preparers. Therefore, the Board decided to amend paragraph 740-270-25-5 to require that the effects of an enacted change in tax law be reflected in the computation of the annual effective tax rate in the first interim period that includes the enactment date to both reduce the costs of applying and simplify the guidance. The Board also noted that this change would align the guidance for changes in tax law in interim periods with the general principle that the effects of enacted changes in tax laws should be recorded on the enactment date.

BC22. The Board acknowledged that recognizing the effects of the enacted change in tax law on current taxes payable on the enactment date could result in recognizing a portion of the effect of a change in tax law in periods before the tax law takes effect. However, that phenomenon also occurs under current guidance because an entity must estimate deferred tax assets and liabilities (that are remeasured at the enactment date) that are expected to reverse in the current year and include that estimate when determining the annual effective tax rate. This is a general consequence of the interim-period income tax model.

Year-to-Date Loss Limitation in Interim Period Tax Accounting

BC23. Under the interim-period income tax model in Subtopic 740-270, an entity is required to make its best estimate of the annual effective tax rate for the full fiscal year at the end of each interim period and use that rate to calculate income taxes on a year-to-date basis. Subtopic 740-270 includes general guidance for calculating income tax expense or benefit when there is a loss for the year-to-date period and anticipated income for the full year and vice versa. That guidance specifies that an entity should apply the annual effective tax rate to the year-to-date income or loss as long as the tax benefits for any losses are expected to be realized during the year or would be recognizable as a deferred tax asset at the end of the year (that is, a valuation allowance would not be necessary).

BC24. Paragraph 740-270-30-28 provides specific guidance for circumstances in which an entity incurs a loss on a year-to-date basis that exceeds the anticipated ordinary loss for the year, which is an exception to the general guidance in

Subtopic 740-270. If an entity has an ordinary loss for the year-to-date period at the end of an interim period that exceeds the anticipated ordinary loss for the year, the income tax benefit recognized for the year-to-date period is limited to the income tax benefit determined on the basis of the year-to-date ordinary loss.

BC25. The Board decided that removing the exception to the general principle in Subtopic 740-270 would reduce the costs and complexity of applying Topic 740 in interim periods. The Board observed that the exception is easily overlooked by preparers and is, thus, prone to errors. Removing the exception would remove that propensity for error. Additionally, the Board decided that eliminating the exception would not significantly change the information provided to users of financial statements because removing the exception would be consistent with the general principle in Subtopic 740-270 and result in more neutral recognition of tax benefits compared with tax expense. The Board acknowledged that removing the exception may result in recognizing tax benefits in a given period that exceed the tax benefits that would be received on the basis of the year-to-date loss, but the Board decided that the benefit of limiting the tax benefits would not outweigh the costs of the limitation.

Codification Improvements

BC26. The Board decided to make two minor improvements to the Codification. Accounting Standards Update No. 2016-09, *Compensation—Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting*, amended paragraph 718-740-45-7 to state that “the tax benefit of tax-deductible dividends on allocated and unallocated employee stock ownership plan shares shall be recognized in *the income statement*” (emphasis added). Before Update 2016-09 was issued, paragraph 718-740-45-7 stated that the tax benefit of tax-deductible dividends for allocated shares should be recognized in income taxes allocated to continuing operations. Other references to the tax effects of tax-deductible dividends throughout the Codification (for example, paragraphs 740-20-45-8(d) and 740-20-55-2(d)) still indicate that the tax benefit of tax-deductible dividends should be recognized in income taxes allocated to continuing operations. Therefore, the Board decided to change the phrase *the income statement* in paragraph 718-740-45-7 to *income taxes allocated to continuing operations* to clarify where the tax benefit of tax-deductible dividends should be shown in the income statement.

BC27. The Board decided to supersede paragraph 323-740-55-8 to remove an error in the calculation of when an impairment should occur under the equity method. The Board noted that Subtopic 323-740, *Investments—Equity Method and Joint Ventures—Income Taxes*, is focused on the application of the proportional amortization method and not the general equity method. Section 323-740-55 includes an example that illustrates the application of the proportional amortization method to an investment in qualified affordable housing projects, so the Board decided that the example in paragraph 323-740-55-8 is not needed.

Effective Date and Transition

BC28. The Board will determine the effective date and whether early adoption of the amendments in this proposed Update should be permitted after it considers stakeholder feedback on the proposed amendments.

BC29. The Board decided that different transition approaches would apply to each income tax simplification because each has a different effect on the financial statements.

Retrospective Transition

BC30. The Board decided to require a retrospective transition approach for the income tax simplification for franchise taxes that are partially based on income because that approach would improve comparability without requiring an entity to incur significant costs. The Board noted that any entity whose income tax is greater than the capital tax in prior periods would simply reclassify the capital tax presented outside of income tax expense to income tax expense. An entity whose capital tax is greater than its income tax in prior periods would be required to reclassify the portion of the capital tax that would have been paid on its income. The Board noted that the entity would have calculated the amount based on income to determine whether the capital tax or income tax was greater. Therefore, the Board observed that the costs of retrospective transition for income statement purposes would be minimal. The Board acknowledged that, in some cases, the simplification may affect the rate used to measure the deferred taxes recognized for temporary differences depending on whether the temporary difference reverses in future years when annual taxable income is expected to exceed the capital tax. In those cases, the costs of retrospective transition would be greater, but the Board decided that prospective transition would not be appropriate because changes in the deferred tax assets and liabilities under a prospective transition would be recognized in expense during the period of adoption.

BC31. The Board also decided to require a retrospective transition approach for the income tax simplification that would clarify that a legal entity that is not subject to tax is not required to be allocated amounts of consolidated current and deferred taxes in its separate financial statements because it could be misleading to show no deferred taxes or income tax expense in the period of adoption and then show deferred taxes and income tax expense in prior periods and vice versa. The Board noted that retrospective transition for this simplification would result in increased comparability and would not be costly in situations in which the entity previously allocated income taxes to an entity that is not subject to tax because the entity only would need to remove deferred taxes and income tax expense in the comparative periods from the separate financial statements of the entity not subject to tax. The Board acknowledged that retrospective transition would result in increased costs if an entity decides to allocate income taxes upon adoption to an entity that is not subject to tax and that is a disregarded entity. However, the Board believes that

allocating income taxes upon adoption to these types of entities will not be common.

Modified Retrospective Transition

BC32. The Board decided to require a modified retrospective transition approach for the income tax simplifications related to changes in ownership of investments. Those simplifications would result in an entity recognizing a deferred tax liability for a foreign subsidiary that became an equity method investment and removing a deferred tax liability for a foreign equity method investment that became a subsidiary. The Board decided that a retrospective transition approach would result in adjusting deferred tax amounts (and potentially income tax expense) related to these investments in each period, which could be costly and complex. The Board noted that a modified retrospective transition (that is, recognizing or removing a deferred tax liability at the beginning of the period of adoption with a cumulative-effect adjustment to retained earnings) not only would reduce the comparability of income tax amounts in comparative periods but also would reduce the cost and complexity of transition. The Board decided that the transition disclosures required would provide investors with information about the change and the reason for the change, which would provide disclosure about the lack of comparability. The Board decided that a prospective transition would not be appropriate for these simplifications because they affect deferred taxes that are recognized on the statement of financial position.

Prospective Transition

BC33. The Board decided to require a prospective transition approach for the other income tax simplifications. Specifically, the Board decided to require prospective transition for the exception to the incremental approach for intraperiod tax allocation to reduce the cost of transition without significantly affecting the comparability of information. This income tax simplification does not affect the amount of deferred taxes or total income tax expense. Therefore, the Board noted that retrospective transition would not affect the statement of financial position but that it would provide comparative information for income tax expense in years in which there is a loss from continuing operations and a gain or income from other components. However, the Board noted that restating comparative periods under retrospective transition would be costly because it would require that an entity recalculate the income tax expense from continuing operations. Additionally, the Board noted that this simplification would apply only when there is a loss from continuing operations and a gain or income from other components, which might not occur in comparative periods. Therefore, investors often see income tax expense presented under these circumstances in some periods and not in others.

BC34. The Board also decided to require a prospective transition approach for the two proposed simplifications that relate to interim reporting (interim-period

accounting for enacted changes in tax law and year-to-date loss limitation in interim-period tax accounting) to reduce the cost of transition without significantly affecting the comparability of information. The Board noted that interim reporting does not affect the amount of deferred taxes or income tax expense at the end of a year, so these simplifications would not affect the amount of deferred taxes recognized at the beginning of the period of adoption. Therefore, the Board noted that retrospective transition would not affect the statement of financial position but that it would provide comparative information for income tax expense in interim periods. However, the Board noted that calculating income tax expense in interim periods is complex and relies upon estimates of anticipated income for the full year. Restating comparative periods under retrospective transition would be costly and complex and would raise questions about whether the estimate of anticipated income for the full year as of the interim date should be updated. Additionally, the Board noted that each of these simplifications applies only in limited circumstances and those circumstances might not occur in comparative periods, so investors often see income tax expense presented under those circumstances in some periods and not in others.

BC35. Additionally, the Board decided to require a prospective transition approach for the income tax simplification for the step up in tax basis of goodwill. The Board noted that this type of transaction often is a one-time transaction, so requiring a prospective transition approach would not affect comparability. The Board also decided to require a prospective transition approach for the Codification improvements because they are minor clarifications and likely would not need transition guidance.

Transition Disclosures

BC36. The Board decided to require that an entity disclose the nature of and reason for the change in accounting principle and a qualitative description of the financial statement line items affected by the change. The Board decided that it would not be cost beneficial to require quantitative disclosures that would effectively require an entity to maintain two sets of accounting records solely to meet disclosure requirements that would not be required when preparing the entity's basic financial statements.

Amendments to the XBRL Taxonomy

The provisions of this Exposure Draft, if finalized as proposed, would require improvements to the U.S. GAAP Financial Reporting Taxonomy (Taxonomy). We welcome comments on these proposed improvements to the Taxonomy through [Proposed Taxonomy Improvements](#) provided at www.fasb.org. After the FASB has completed its deliberations and issued a final Accounting Standards Update, the proposed improvements to the Taxonomy will be finalized as part of the annual release process.
